New OASIS Fee Structure

During the IAQG meeting held in October 2018 in Busan (South Korea), IAQG established a new OASIS Fee structure that will become effective for future audit entry or certificate modifications that are published in OASIS on or after January 1st, 2019.

The entry to OASIS of each certification for an Aerospace Quality Management System (AQMS) standard i.e. 9100, 9110 and 9120 has associated fees.

The fees provide for the initial entry and maintenance of a certification for three years, or part thereof and for modification in relation to early recertification or transfers of certification.

An invoice for each transfer, certification, or recertification is created and sent, through the NetSuite system by SAE, on behalf of the IAQG, to the Certification Body (CB) that has published the OASIS data.

The CB is responsible for payment of the OASIS fees. Payment of invoices is due within 30 days of receipt by the responsible CB. Failure by a CB to pay such fees may result in CB suspension.

Certification Bodies are to ensure internal personnel and Clients are aware of all the new applicable fees in relation to the entry of data in OASIS. The IAQG reserves the right to change fees or establish individual IAQG sector fees in accordance with 9104-1, Section 20.1 requirements.

For clarification regarding this new OASIS Fees structure, see the table below:
## Update Communication

<table>
<thead>
<tr>
<th>Category</th>
<th>2019 Fee</th>
<th>Description</th>
</tr>
</thead>
