Subject : Preventing incorrect Oversight Assessment details data entry.

Preventing incorrect Oversight Assessment details data entry

OASIS has been modified to perform these actions:

1. When the OP Assessor sets the Joint Oversight to ‘No’, it will clear the content of the Lead AB Assessor Name (Joint Only) and disable it so the user cannot enter data in that field.

2. When the OP Assessor sets the Joint Oversight to ‘Yes’, it will enable the user to enter data into the Lead AB Assessor Name (Joint Only) field.

3. When the Joint Oversight is set to ‘Yes’, Supplemental Oversight will be set to ‘No’
4. When the Supplemental Oversight is set to ‘Yes’, Joint Oversight will be set to ‘No’

The above changes apply to new data entry and data entry steps taking during assessment modifications.

In case of questions, please contact the IAQG support function at: IAQGsupport@sae.org or your OASIS Sector Representative:

- Americas - Becky Lemon - rebecca.lemon@sae.org
- Asia/Pacific - Takayoshi Maehata - takayoshi.maehata@sjac.or.jp
- Europe - Ian Folland - icf@iseesols.com

Sincerely,

IAQG Database Team
